Cabinet Box Construction

The foundation of every Integrity cabinet is built on strength, beauty, and performance you can trust.

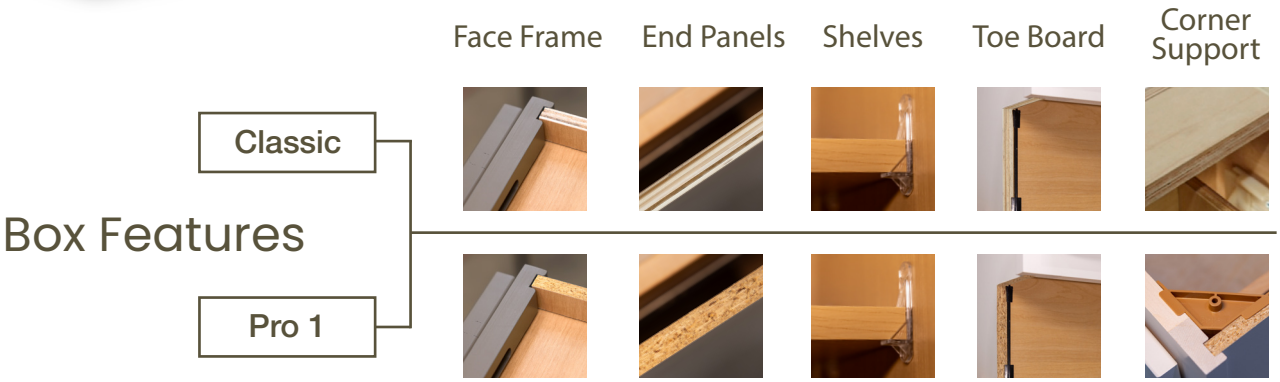

• **Pro 1 Series** – A streamlined cabinet design with refined everyday functionality. Featuring a furniture-grade drawer box and undermount soft-close slides, Pro 1 supports nearly all the same door styles, finishes, and customization options found in the Classic Series-providing broad design flexibility backed by Integrity quality.

• **Classic Series** – offers an elevated construction approach, combining a plywood cabinet box with hardwood dovetail drawer boxes and full-extension soft-close hardware. Built for long-term durability and exceptional performance, Classic provides a cabinet experience that stands out with quality, versatility, and craftsmanship.

Both series are crafted with precision joinery to support heavy loads and paired with premium hardware—hinges, slides, and fittings—for smooth operation. With Integrity Cabinets, you get lasting beauty and reliable function tailored to your needs.

Classic & Pro 1 Box Features

The Classic Series features a premium boxed-in design with reinforced construction, a Limited Lifetime Warranty, and upgraded materials that deliver a more substantial feel. The Pro 1 Series offers a strong 3-year warranty. Engineered for value, durability, and clean functionality, giving customers dependable performance. Both series deliver Integrity quality — just tuned to different needs, budgets, and customer/designer expectations.

Methods & Techniques

Methods

Pen glaze, hand-wiped glaze, and brushed glaze are finishing techniques used to elevate the look of cabinet doors. Each method enhances detail in a different way—adding depth to the wood grain, highlighting profiles, or creating a soft, aged character. While all three enrich the surface, they deliver distinctly different visual effects depending on the style you want to achieve.

Jade w/ Taupe Brush

Pen glaze involves using a pen-like applicator to apply a thin layer of glaze to the profile/detail areas of the door.

Jade w/Black Pen

After applying the glaze to the door, any excess is Hand Wiped away, which serves to highlight the wood grain and the door's profile.

Pebble Gray w/
Pewter Hand Wipe

Brush glaze involves using a brush to apply the glaze to the door.

Glaze Colors

Rub Thru

Distressed

Vintage

Techiques

Rub-thru, distressing, and vintage finishes are specialty techniques designed to give cabinet doors a distinctive, timeworn character. Rub-thru gently removes finish along edges and high points, revealing subtle undertones where natural wear would occur. Distressing adds deliberate marks and texture to create a more pronounced aged effect. Together, these techniques introduce depth, authenticity, and rustic charm—ideal for achieving an antique-inspired look with personality.
